

Willow Community Fund

Fictional operating report | 2026-09-08

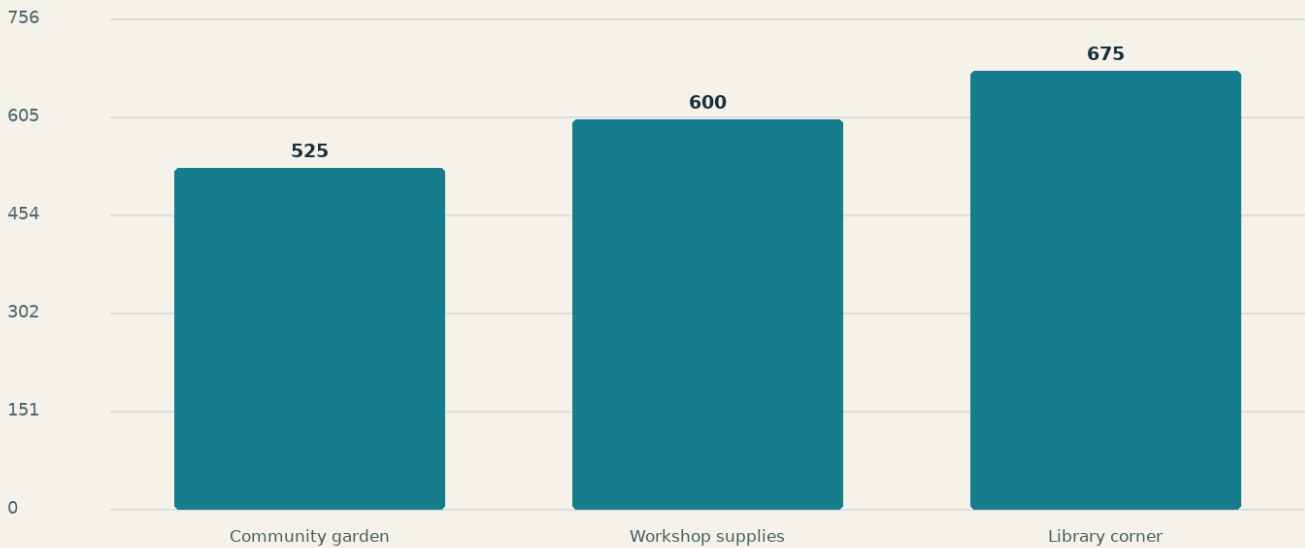

Fictional fundraising campaigns and supporters with reconciled pledged, received and outstanding amounts.

Metric	Value	Unit
Pledged support	2,850.00	USD
Received support	1,800.00	USD
Outstanding pledges	1,050.00	USD

NOVUS EXAMPLES / FICTIONAL OPERATING DATA

Willow Community Fund

Received by campaign (USD)

Source: included operating-model.json. Fixed snapshot 2026-09-08.

Files and expected behavior

The workbook, chart and result assertions are derived from the same linked records. operating-model.json carries every source table. Schema validation covers field types; declared relational rules check uniqueness and references.

Source table	Records	Primary key
campaigns	3	campaign_id
donors	8	donor_id
pledges	12	pledge_id
grants	3	grant_id
volunteers	8	volunteer_id
events	4	event_id
volunteer_shifts	16	shift_id
impact	4	impact_id

Using the example

Blank input tables

blank-input-tables.zip contains a header-only CSV for every source table and a setup guide. Start with those files when you need a reusable empty template. Keep identifiers consistent across tables; the paired JSON Schema describes the data types.

No actual donors or tax-receipt identifiers are included. Amounts do not establish charitable status or deductibility.

Use guide.md for the import sequence and expected-results.json for exact numeric assertions. Negative test records are intentionally invalid and belong in a validation harness.
