Wine is poured at 150 ml from a 750 ml bottle. Where a drink is sold both ways, the by the glass price is the bottle price divided by 5 pours and rounded up to the next 0.25, so a bottle is always the better value per millilitre.

Drinks are outside the shared ingredient costing study, so no plate cost is published for them. The food menu is priced from plate-costs.csv; these are list prices only.
